

10 YARD ZERO TARGET

Simulates 50/200 Yard Zero | AR-15 with 2.5" Optic Height Over Bore

INSTRUCTIONS:

1. Place target at exactly 10 yards. Major grid squares are exactly 1 inch.
2. Aim at the exact center of the top black square. Adjust optic until group centers in the lower dashed circle.
3. A 2.0" low offset at 10 yards establishes a baseline 50-yard zero.
4. Print at 100% scale (Actual Size) to ensure grid accuracy.
